

RTS28 Summary Analysis

2019

To comply with the delegated regulation associated with Markets in Financial Instruments Directive II (MiFID II), EFG Private Bank Limited must publish a summary of the analysis and conclusions from detailed monitoring of the quality of execution obtained.

Foreword

EFG Private Bank Limited¹ is made up of two elements for execution purposes; EFG Private Bank and EFG Harris Allday.

EFG Private Bank outsources its discretionary management of client portfolios to EFG Asset Management (EFGAM). Nondiscretionary client orders are routed via the Dealing Desk at EFG Harris Allday for execution. The Treasury execute client orders by entering directly into a contract with market counterparties making reference to market price.

EFG Harris Allday client orders are executed in one of two ways; directly by the CRO via a Retail Service Provider² (RSP) or transmitted to the Dealing Desk at EFG Harris Allday for execution. Information relates to all trades executed in 2019 only³.

The data in the tables below illustrates EFG Private Bank Limited's Top 5 venues in terms of trading volumes, split by financial instrument, interaction with the counterparty and client type in accordance with MiFID II regulation.

EFGPB clients with discretionarily managed investments can review those top-5 venue reports [here](#).

¹ EFG Private Bank Limited includes both divisions, EFG Private Bank (inc. Treasury) and EFG Harris Allday.

² An RSP is otherwise known as a market maker offering prices in smaller sized 'retail' volumes.

³ We have made every effort to include all relevant trades. However, a small number of trades are omitted for technical reasons.

Terms used throughout this report

Proportion of volume traded as a percentage of total in that class

Volume traded, meaning the market value of orders.

Proportion of orders executed as percentage of total in that class

Proportion, meaning the number of orders executed.

Passive order

An order entered into the order book that provided liquidity. For example, a limit or stop order.

Aggressive order

An order entered into the order book which took liquidity. For example, an order to trade at market.

Directed order

An order where a specific execution venue was specified by the client prior to the execution of the order.

Tiers used for equity reports

Tiers 1 & 2 means low liquidity; from 0 to 79 trades per day.

Tiers 3 & 4 means medium liquidity, from 80 to 1999 trades per day.

Tiers 5 & 6 means high liquidity meaning 2000 and above trades per day.

RTS28 summary analysis equities – shares & depositary receipts

- High liquidity: Tick size liquidity bands 5 and 6 (from 2000 trades per day)
- Medium liquidity: Tick size liquidity bands 3 and 4 (from 80 to 1999 trades per day)
- Low liquidity: Tick size liquidity band 1 and 2 (from N/A to 79 trades per day)

Equities top five execution - equities - shares & depositary receipts (tiers 5 & 6)

Summary of execution quality

There are eight areas in the delegated regulation set out in (a) to (h) below.

a) An explanation of the relative importance the firm gave to the execution factors of price, costs, speed, likelihood of execution or any other consideration including qualitative factors when assessing the quality of execution;

Throughout 2019, EFG Private Bank Limited maintained an Order Handling and Best Execution Policy, which noted:

When executing an order, EFG Private Bank Limited shall take into account the following factors:

- Price of the financial instrument;
- Costs of transaction (i.e. the fees charged for executing an order on a particular venue) which are passed onto you, directly or indirectly;
- Speed;
- Likelihood of execution and settlement; and
- Size and nature of order.

We will also take into account:

- Any other relevant considerations (such as market impact);
- Whether you have given us specific instructions (because execution according to your instructions will satisfy the best execution obligation).

For retail clients only: Obtaining the best possible result will take into account 'total consideration'. Total consideration consists of the price of the financial instrument and the costs related to execution, including any expenses incurred which are directly related to the execution of the order such as any execution venue fees, clearing and settlement fees, and any other fees paid to third parties involved in the execution of the order.

For Professional clients: In some circumstances, the importance of these factors will be weighted according to the product.

For all classes of financial instrument, ordinarily, price will merit a high relative importance in obtaining the best possible outcome for clients. In certain circumstances, for some client orders, financial instruments or markets, EFG Private Bank Limited, at its absolute discretion, may have decided that other factors were more important in determining the best possible results for clients in accordance with the policy.

b) A description of any close links, conflicts of interest, and common ownerships with respect to any execution venues used to execute orders;

Best execution policies across EFG Private Bank Limited and EFGAM are aligned for consistency in execution standards. EFG Private Bank Limited performs regular monitoring of EFGAM's executions. For further information please refer to the EFG conflicts of interest standard which sets out how potential conflicts of interest are managed.

c) A description of any specific arrangements with any execution venues regarding payments made or received, discounts, rebates or non-monetary benefits received;

EFG Private Bank Limited does not have specific arrangements with any execution venues regarding payments made or received discounts, rebates or non-monetary benefits.

EFG Private Bank Limited has commission rate agreements with all venues for overseas and Direct Market Access (DMA)⁴ trades.

d) An explanation of the factors that led to a change in the list of execution venues listed in the firm's execution policy, if such a change occurred;

EFG Private Bank Limited has no new or terminated relationships with venues during 2019. For further information regarding choice of execution venues please refer to the Best Execution Policy.

e) An explanation of how order execution differs according to client categorisation, where the firm treats categories of clients differently and where it may affect the order execution arrangements;

Throughout 2019, EFG Private Bank Limited maintained an Order Handling and Best Execution Policy, which noted,

For retail clients only: Obtaining the best possible result will take into account 'total consideration'. Total consideration consists of the price of the financial instrument and the costs related to execution, including any expenses incurred which are directly related to the execution of the order such as any execution venue fees, clearing and settlement fees, and any other fees paid to third parties involved in the execution of the order.

For Professional clients: In some circumstances, the importance of these factors will be weighted according to the product.

Since the introduction of MiFID II on 3rd January 2018, and the implementation of the updated EFG Private Bank Limited Order Execution Policy, our approach to execution does not differ depending on client categorisation.

f) An explanation of whether other criteria were given precedence over immediate price and cost when executing retail client orders and how these other criteria were instrumental in delivering the best possible result in terms of the total consideration to the client;

EFG Private Bank Limited (excl. Treasury) will, on occasion and at their discretion, work an order over the day, typically when the order is large relative to average market size. The immediate price for the full size of the order may not be the best price available versus working the order in smaller tranches over the day.

In rare cases, EFG Private Bank Limited will follow the specific instruction of the client in relation to how an order should be executed. For further details, please see the Order Handling and Execution Policy.

g) An explanation of how the investment firm has used any data or tools relating to the quality of execution, including any data published under Commission Delegated Regulation (EU);

Data on all executions is fed into transaction cost analysis (TCA) vendor software to enable the firm to monitor and assess the quality of execution strategies. Monitoring of executions is undertaken post-trade with the aim of identifying poorly performing trades and venues and providing feedback to client-facing staff to provide better solutions for client executions. This may lead to changes in execution practices.

h) Where applicable, an explanation of how the investment firm has used output of a consolidated tape provider established under Article 65 of Directive 2014/65/EU.

There are no CTPs currently in operation. However, EFG Private Bank Limited's vendor software used to provide TCA to EFG Private Bank Limited, accesses data from other venues and approved publication agents.

⁴ Direct market access (DMA) is a term used in financial markets to describe electronic trading facilities that give investors wishing to trade in financial instruments a way to interact with the order book of an exchange. Normally, trading on the order book is restricted to broker-dealers and market making firms that are members of the exchange.
