1. Equities

a. Scope

The best execution considerations for equities apply to the following financial instruments:

| Level 1 | Level 2 | Level 3 | MIFID categorisation |
|---------|-----------------------------|--------------------------------------|---|
| Equity | Listed Equity | Listed Equity | (a) Equities - Shares & Depositary Receipts |
| Equity | Listed Equity | Listed Convertible Equity | (a) Equities - Shares & Depositary Receipts |
| Equity | Listed Equity | China A Share | (a) Equities - Shares & Depositary Receipts |
| Equity | Listed Equity | Thailand - Foreign Owned | (a) Equities - Shares & Depositary Receipts |
| Equity | Listed Equity | HK H Share | (a) Equities - Shares & Depositary Receipts |
| Equity | Listed Equity | HK Red Chip | (a) Equities - Shares & Depositary Receipts |
| Equity | Listed Equity | REIT | (a) Equities - Shares & Depositary Receipts |
| Equity | Collective Vehicle (Equity) | Open Ended Investment Company | N/A |
| Equity | Collective Vehicle (Equity) | Open Ended Property Fund | N/A |
| Equity | Collective Vehicle (Equity) | Exchange-Traded Fund | (k) Exchange Traded products |
| Equity | Collective Vehicle (Equity) | Investment Trust | (a) Equities - Shares & Depositary Receipts |
| Equity | Collective Vehicle (Equity) | Real Estate Investment Trust | (a) Equities - Shares & Depositary Receipts |
| Equity | Other Equities | Other Equities | (a) Equities - Shares & Depositary Receipts |
| Equity | Other Equities | Participation Note | (k) Exchange Traded products |
| Equity | Rights | Rights | (a) Equities - Shares & Depositary Receipts |
| Equity | Depositary Receipt | American Depositary Receipt (ADR) | (a) Equities - Shares & Depositary Receipts |
| Equity | Depositary Receipt | Global Depositary Receipt (GDR) | (a) Equities - Shares & Depositary Receipts |
| Equity | Depositary Receipt | Non-Voting Depositary Receipt (NVDR) | (a) Equities - Shares & Depositary Receipts |
| Equity | Depositary Receipt | European Depositary Receipt | (a) Equities - Shares & Depositary Receipts |

b. Approach to Trading

For equity trading on discretionary managed accounts, we have an arrangement whereby we will trade with three global providers, who are obliged to provide best execution, via the FIX links in our order management system. For equity trading on New Capital Funds, execution is specific to the individual fund and the primary listing of the underlying stock being traded. Further details are in the EFGAM procedures document.

c. Approach to obtaining Best Execution

Equity orders are executed through the venues outlined in Appendix A, or where appropriate through Tradeweb's Request for Quote electronic trading platform.

d. Prioritisation of Execution Factors

The most important factors are price, liquidity and service. Other relevant factors are the size of the order and the likelihood and speed of execution. In executing orders in equities, EFGAM UK uses brokers that have direct access to a number of trading platforms (Regulated Market, Systematic Internalization or Multilateral Trading Facility). In general the orders are executed on the trading platform that offers the highest liquidity.

2. Fixed Income

a. Scope

The best execution considerations for Fixed Income apply to the following financial instruments:

| Level 1 | Level 2 | Level 3 | MIFID categorisation |
|---------|---------------------------|--------------------------------------|---|
| Bond | Conventional | Conventional | (b) Debt Instruments (i) Bonds |
| Bond | Floating Rate | Floating Rate | (b) Debt Instruments (i) Bonds |
| Bond | Index Linked | Index Linked | (b) Debt Instruments (i) Bonds |
| Bond | Collective Vehicle (Bond) | Open Ended Investment Company (Bond) | N/A |
| Bond | Collective Vehicle (Bond) | Investment Trust (Bond) | (a) Equities - Shares & Depository Receipts |
| Bond | Collective Vehicle (Bond) | Exchange-Traded Fund (Bond) | (k) Exchange Traded products |
| Cash | Liquid Asset | Term Deposit | (b) Debt Instruments (ii) Money Markey Instruments |

b. Approach to Trading

For Fixed income, depending on liquidity and size of the trade, the trader will determine if the transaction should be dealt electronically or by VOICE (IB chat, phone). In both cases, the trader will ask for a minimum of three quotes unless the trader deems beneficial to clients to maintain a high level of market anonymity by only contacting one or two Counterparties to obtain a price. The best price will be use to trade and all quotes will be recorded. Where prices are contingent on a buy and a sell leg of a trade we may at our discretion seek to achieve the lowest overall cost which may not represent the best individual price on any single leg. The selection of Counterparties for Best Execution will be based on screen prices, RUNS, liquidity and frequency of quotes. All timestamps will be recorded in the trading platform, along with the competing quotes to ensure Best Execution.

c. Approach to obtaining Best Execution

EFGAM uses Bloomberg MTF, Tradeweb and MarketAxess as the primary venues of execution, where it is possible to interact with prices from a range of

brokers. In limited circumstances, an order may be routed to a single broker, or smaller field of brokers, on an OTC basis.

d. Prioritisation of Execution Factors

Price (typically observed through an RfQ mechanism), will be the primary criteria to obtain the best result for clients however alternative strategies could be used where it is deemed to be in the best overall interest of the trade. Other factors such as timing and transaction costs will also be actively considered.

3. Derivatives

a. Scope

The best execution considerations for Derivatives apply to the following financial instruments:

| Level 1 | Level 2 | Level 3 | MIFID categorisation |
|------------|--------------------|-------------------------|---|
| Derivative | Future | Interest Rate Future | (c) Interest rates derivatives (i) Futures and Options admitted to trading on a trading venue |
| Derivative | Future | Stock Index Future | (g) Equity Derivatives (i) Options and Futures admitted to trading on a trading venue |
| Derivative | Future | Bond Future | (d) Credit derivatives (i) Futures and Options admitted to trading on a trading venue |
| Derivative | Future | Currency Future | (e) Currency derivatives (i) Futures and Options admitted to trading on a trading venue |
| Derivative | Future | Commodity Future | (i) Commodities derivatives and emission allowances Derivatives (i) Options and Futures admitted to trading on a trading venue |
| Derivative | Future | Financial Index Future | (g) Equity Derivatives (i) Options and Futures admitted to trading on a trading venue |
| Derivative | Option | Option on Future | N/A - depends on the Future |
| Derivative | Option | Option on Equity | (g) Equity Derivatives (i) Options and Futures admitted to trading on a trading venue |
| Derivative | Option | Option on Stock Index | (g) Equity Derivatives (i) Options and Futures admitted to trading on a trading venue |
| Derivative | Option | Option on Security | N/A - depends on the Security |
| Derivative | Forward | Deliverable Forward | (e) Currency derivatives (ii) Swaps, Forwards and other currency derivatives |
| Derivative | Forward | Non Deliverable Forward | (e) Currency derivatives (ii) Swaps, Forwards and other currency derivatives |
| Derivative | Credit Linked Note | Bond Like Note | (b) Debt Instruments (ii) Money Market Instruments |

| | | | |
|------------|---------------------------------------|---------------------------------------|--|
| Derivative | Warrant | Warrant - Other Equity | (h) Securitised Derivatives (i) Warrant and Certificate Derivatives |
| Derivative | Collective Vehicle (Derivative) | Collective Vehicle (Derivative) | N/A |
| | Swap | Equity | Equity Derivatives |

b. Approach to Trading

Listed derivatives are executed via MS Passport (Morgan Stanley), Other derivatives are executed via Evolve (HSBC), Bank of America Merrill Lynch. In executing orders in derivatives, EFGAM uses brokers with direct access to various trading platforms. The current view is that in order to minimise the transactional costs associated with execution we have selected one venue for executing.

In the case of OTC derivatives, the level of service is also an important factor in selecting where the order is executed. The procedure for OTC derivatives is described in the Order Execution Procedures.

c. Approach to obtaining Best Execution

The EFGIUK Treasury acts as the counterparty to all Foreign Exchange (FX) orders received from EFGIUK clients. The price provided to clients will be referenced to the current best price sourced from Thomson Reuters FXAll MTF, to ensure the client receives a representative market outcome.

d. Prioritisation of Execution Factors

Price (typically observed through an RfQ mechanism), will be the primary criteria to obtain the best result for clients. Other factors such as timing and transaction costs will also be actively considered.

For Warrants - Due to the illiquid nature of these financial instruments, timing and liquidity will be prioritised alongside price as the primary criteria to obtain the best result for clients.

For Structured Products - Due to the illiquid nature of these financial instruments, timing and liquidity will be prioritised alongside price as the primary criteria to obtain the best result for clients

4. Investment Funds

a. Scope

The best execution considerations for Investment Funds apply to the following financial instruments:

| Level 1 | Level 2 | Level 3 | MIFID categorisation |
|---------------------|---------------------------------------|---|-----------------------|
| Cash | Collective Vehicle (Cash) | Open Ended Investment Company (Cash) | N/A |
| Other Instrument | Collective Investment Scheme units | UCITS units | (m) Other Instruments |
| Other Instrument | Collective Investment Scheme units | AIF units | (m) Other Instruments |

b. Approach to Trading

With investment funds, quality and settlement costs are the decisive factors. The trading price is not determined by supply and demand but primarily by the net asset value, which is the value of the underlying investment portfolio of the investment fund concerned divided by the number of units of participation in issue.

c. Approach to obtaining Best Execution

Given the singular pricing nature of Collective investment schemes, it is not possible to use traditional methods to verify best execution. Information regarding fees and expenses should be taken into account and made available on request however.

d. Prioritisation of Execution Factors

In order to obtain an execution in a CIS, time is the most important factor given that funds typically have a cut off time for when the next available NAV can be achieved.
